Message from the Guest Editor

Dear Colleagues,

The journal *Molecules* intends to set up a Special Issue on “Review Papers in Organic Synthesis” dedicated to all aspects of organic synthesis. As the editors of the Special Issue, we are welcoming proposals for review articles covering all fundamental and application aspects in the field of Organic Synthesis (synthesis; catalysis; methods development; application, theoretical, computational, and mechanistic studies; future perspectives, etc.).

Distinguished researchers from all over the world are invited to contribute to this issue. In order to avoid overlapping of topics, potential contributors/invited authors are kindly requested to submit to the editors a tentative article title and a 1–2 page description/table of contents for pre-evaluation.

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.
