Deadline for manuscript  
submissions:

**closed (31 May 2019)**

### Message from the Guest Editor

Schiff bases are one of the most popular and old ligands in coordination chemistry. Known since 1864 when, for the first time, Ugo Schiff reported on products deriving from the condensation of ketones or aldehydes with primary amines, such derivatives have been extensively used for countless applications. Their easy synthesis allows for finetuning of their stereo-electronic features, and their ability to form stable complexes with most transition metals easily provides access to a large variety of derivatives with remarkable biological and catalytic activities, electroluminescent, fluorescence and nonlinear properties that can be used in many research fields for exciting applications.

For this Special Issue of Molecules, I would like to kindly invite worldwide colleagues working in this research area to submit original research articles and reviews on all the aspects of the chemistry of these ligands and of their metal complexes.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Reaxys](#), [CaPlus / SciFinder](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1 (Chemistry (miscellaneous))
