Message from the Guest Editor

Dear Colleagues,

It is our pleasure to launch a high-profile Special Issue on the occasion of the 65th birthday of Jonathan L. Sessler of the University of Texas at Austin. The issue will consist of a series of invited papers contributed by scholars from all over the world. It would be a huge honor if you would join us in celebrating this rare occasion by submitting an article detailing your exciting research related to Supramolecular Anion-Binding and Molecular Recognition.

You may choose our [Joint Special Issue](#) in *Chemistry*.

Message from the Editor-in-Chief

As the premier open access journal dedicated to experimental organic chemistry, and now in its 25th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts and novel materials. Pushing the boundaries of the discipline, we invite papers on multidisciplinary topics bridging biochemistry, biophysics and materials science, as well as timely reviews and topical issues on cutting edge fields in all these areas.
