# 25th Anniversary of Molecules - Featuring Element 25: Manganese and/or Other Metals

### Message from the Guest Editors

The Special Issue of the Molecular Structure section of Molecules commemorating the 25th anniversary of the journal will feature papers on element 25: manganese (Mn). Whereas manuscripts are sought that deal with the structural chemistry of Mn, we also invite contributions dealing with other aspects of Mn and/or other metals. Papers may include full-length research articles, short communications, or focused reviews. Subject matter may include, but not be limited by, the topics shown below in the keywords list.

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 29th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.
