

Special Issue

Byproducts from the Food Industry

Message from the Guest Editor

Food industry byproducts are generated in large amounts and pose a large burden for the environment. Along with efforts to reduce the impact of food production on the environment and to ensure sustainable food production, byproducts have attracted increased attention in the scientific and professional community. Although composting and use as feed have long been a partial solution to reduce the quantity of effluents, in recent years, food industry byproducts have become novel raw materials for the extraction of different bioactive components and adsorbents for wastewater treatment, as well as being incorporated into different food products and packaging materials, etc. The Special Issue on “Byproducts from the Food Industry” is therefore focused all aspects of research regarding food industry byproducts, from the isolation of different components to the modification of specific byproduct targeting specific applications, biofuels, potential applications in food and other industries, safety issues, etc. This Special Issue aims to gather original research articles and reviews of up-to-date literature regarding the potentials of food industry byproducts.

About the Journal

Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
