

## Special Issue

# Chitosan-Based Nanomaterials for Biomedical Applications

### Message from the Guest Editor

Being the second most abundant natural polymer on Earth, chitosan possesses many unique chemical, structural and biological properties that make it attractive for numerous biomedical applications. Chitosan can be easily fabricated into different nanomaterials or nanocomposites, such as nanofibers, nanoparticles, gels, micelles and liposomes, to suit different needs. In addition, numerous approaches developed for chitosan have also overcome limitations in biomedical fields by using chitosan derivatives, composites or nanocomposites. This Special Issue aims to provide a broad coverage of recent research progress or up-to-date reviews addressing various aspects in this field. We are seeking contributions from researchers to discuss all application aspects of chitosan nanomaterials in tissue engineering, regenerative medicine, drug delivery, wound healing and diagnostics. Critical reviews by experts in these fields are also welcomed.

### Guest Editor

Prof. Dr. Jyh-Ping Chen  
Department of Chemical and Materials Engineering, Chang Gung University, Taoyuan 33302, Taiwan

### Deadline for manuscript submissions

closed (30 April 2019)

## About the Journal

### Message from the Editor-in-Chief

As the premier open access journal dedicated to molecular chemistry, now in its 30th year of publication, the papers published in *Molecules* span from classical synthetic methodology to natural product isolation and characterization, as well as physicochemical studies and the applications of these molecules as pharmaceuticals, catalysts, and novel materials. Pushing the boundaries of the discipline, we invite papers on all major fields of molecular chemistry and multidisciplinary topics bridging chemistry with biology, physics, and materials science, as well as timely reviews and topical issues on cutting-edge fields in all of these areas.

---

### Editor-in-Chief

Prof. Dr. Thomas J. Schmidt

Institute of Pharmaceutical Biology and Phytochemistry, University of Münster, Corrensstrasse 48, D-48149 Münster, Germany

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Reaxys, CaPlus / SciFinder, MarInLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Biochemistry and Molecular Biology) / CiteScore - Q1 (Organic Chemistry)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.1 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
