Message from the Guest Editor

Dear Colleagues,

Mass spectrometry imaging (MSI) makes the possibility of combining histological information with a label-free mass spectrometric imaging technology.

In this Special Issue on “Mass Spectrometry Imaging”, we welcome researchers to submit both original research manuscripts, as well as review papers, on all areas of in vitro and in vivo Imaging Mass Spectrometry. The goal of this Special Issue is to collect the most recent state of the art technological developments, applications, sample pre-treatment protocols and data analysis workflows in this emerging scientific field.

Methods and Protocols (ISSN 2409-9279) is an open access journal devoted to the publication of new procedural approaches and cutting-edge methodological developments. The ultimate objective of this new forum of scientific communication is to provide researchers with an indispensable tool, enabling better use of the latest scientific technologies. With a broad and totally interdisciplinary focus, *Methods and Protocols* was established with the objective of facilitating cross-fertilization and cross-talk in the scientific arena. Methods and protocols in Life Sciences, Chemistry, Biomedical Sciences, Engineering, and in their intersections such as Biotechnology and Nanotechnology will constitute the core of the journal. However, we anticipate that other fundamental disciplines such as Physics or Geology will be rapidly incorporated.
