Technology, University of
Twente, P.O. Box 217, 7500 AE
Enschede, The Netherlands

Deadline for manuscript
submissions:

7 March 2025

Message from the Guest Editors

Dear Colleagues,

Boiling and condensation are representative heat transfer processes in air conditioning, heat pumps, and Rankine cycles while icing on wind turbine blades is also a significant issue in turbine operation. Nowadays, with the development of micro/nanotechnologies, material sciences provide new perspectives regarding improvements in these thermal processes.

The present Special Issue aims to demonstrate the state of the art in thermal energy transport, storage, and conversion. Original research papers, brief research reports, and review papers that address the following topics are welcome:

- Micro/nano-structure surfaces for boiling, condensation, deicing, combustion, lubrication;
- Advanced thermoelectric materials;
- Energy storage materials;
- Flammable materials.

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal-organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (General Chemical Engineering)
