Environment and Materials,  
Guangxi University, Nanning  
530004, China

Deadline for manuscript  
submissions:

**closed (31 December 2023)**

### Message from the Guest Editors

The purpose of the present Special Issue is to elucidate the state-of-the-art of this growing research field from a fundamental and application perspective. Concretely, this Special Issue seeks to publish cutting-edge scientific advances in photo(electro)catalysis, with several key issues on the development of novel catalysts and synthetic methods, exploring physicochemical properties, structure-activity relationship, stability, and durability, as well as mechanism of catalytic reactions on the nano-photocatalysts/photo(electro)catalysts based on experimental studies and theoretical simulation.

The format of welcomed articles includes original research articles, communications, and reviews. Apart from papers on fundamental research, reports on industrial applications of photo(electro)catalysis processes in various fields are also welcomed. Potential topics include, but are not limited to, the following:

- Photo(electro)catalytic degradation of pollutants;
- Photo(electro)catalytic water splitting;
- Photo(electro)catalytic reduction of carbon dioxide;
- Photo(electro)catalysis for hydrogen peroxide generation.

## Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal-organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (General Chemical Engineering)
