## Advanced Nanomaterials for Electrochemical Energy Conversion and Storage

Guest Editors:

**Prof. Dr. Rongming Wang**

School of Mathematics and Physics, University of Science and Technology Beijing, Beijing 100083, China

**Prof. Dr. Shuhui Sun**

Center for Energy, Materials and Telecommunications, Institut National de la Recherche Scientifique (INRS), Quebec, QC J3X 1S2, Canada

Deadline for manuscript submissions:

**closed (20 July 2022)**

### Message from the Guest Editors

The purpose of this Special Issue is to provide a research forum to report the latest developments in nanomaterials for various applications in electrochemistry, and explore the potentials of nanomaterials for use in future electrochemical energy devices.

The topics of interest include, but are not limited to, the following:

- Nanomaterials for electrocatalysis;
- Nanomaterials for fuel cells;
- Nanomaterials for lithium batteries and beyond;
- Nanomaterials for metal–air batteries;
- Nanomaterials for supercapacitors;
- Nanomaterials for CO<sub>2</sub> reduction;
- Nanomaterials for H<sub>2</sub> generation and storage;
- Fabrication of novel nanostructures/nanocomposites by electrochemical methods;
- Structure and electrochemical characterization techniques.

of California Davis, One Shields  
Avenue, Davis, CA 95616-5270,  
USA

## Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal-organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (General Chemical Engineering)
