**Prof. Dr. Manuel A. Coimbra**

**Prof. Dr. Carmen S. R. Freire**

**Dr. Antonio Martínez-Abad**

Deadline for manuscript  
submissions:

**closed (20 December 2020)**

### Message from the Guest Editors

Dear Colleagues,

The 6th EPNOE International Polysaccharide Conference was an initiative of EPNOE, the Cellulose and Renewable Division of the American Chemistry Society (ACS), and the Cellulose Society of Japan (CSJ) and was hosted in Aveiro, Portugal (<https://epnoe2019.sciencesconf.org/>).

The ambition of the EPNOE International Polysaccharides Conferences is to bring together researchers from academia and industry working on or interested in polysaccharide-related R&D topics, to disseminate results and to promote a networking platform for close interactions between academia and industry.

The scientific program was structured in Thematic Sessions covering different areas where polysaccharides have a relevant role, including several topics on polysaccharide-based nanomaterials, co-organized by scientific experts in each field.

The event provided an opportunity for delegates to discuss and share knowledge, ideas, and expertise with colleagues and peers.

## Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal-organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [CAPlus / SciFinder](#), [Inspec](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (General Chemical Engineering)
