Fabrication and Characterization of Nanostructured Carbon Electrodes

Guest Editors:

Dr. Meltem Yanilmaz

Textile Technology and Design,
Istanbul Technical University,
Istanbul, Turkey

Dr. Jiadeng Zhu

Oak Ridge National Laboratory,
Oak Ridge, TN 37830, USA

Deadline for manuscript
submissions:

closed (31 October 2022)

Message from the Guest Editors

This Special Issue on “Fabrication and Characterization of Nanostructured Carbon Electrodes” will attempt to cover the recent advances in nanostructured carbon electrodes for rechargeable batteries and supercapacitors, concerning not only their synthesis and characterization but also their functional properties as well as practical applications. Therefore, this Special Issue welcomes contributions in the form of full papers, communications, perspectives, and reviews from all researchers working on nanostructured electrodes, as well as on their characterization and properties.

For further reading, please follow the link to the Special Issue Website at: <http://www.mdpi.com/si/65183>

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access. We are proud of our increasing impact factor and ability to provide rapid decisions to authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General Chemical Engineering)
