## Gold Complex Nanoparticles

Guest Editors:

**Dr. Jolanda Spadavecchia**

CNRS, UMR 7244, NBD-CSPBAT,  
Laboratoire de Chimie,  
Structures et Propriétés de  
Biomatériaux et d'Agents  
Thérapeutiques Université Paris  
13, Sorbonne Paris Cité, Bobigny,  
France

**Dr. Nathalie Dupont**

CSPBAT, CNRS UMR 7244,  
université Sorbonne Paris Nord,  
France

Deadline for manuscript  
submissions:

**closed (25 May 2022)**

### Message from the Guest Editors

We kindly invite you to submit your contribution to the Special Issue entitled “Gold Complex Nanoparticles”. This issue will include several topics concerning innovative nanomaterials towards synthesis, nanotherapeutics, modeling conjugate complex, chemical and physical sensing, and nanomedicine, amongst other relevant topics.

The main goal of this issue is to showcase innovative ways of synthesise gold complex as nanotherapeutics, and nano-based formulations in the development of delivery systems and biosensing . Up-to-date original research and reviews on the ground-breaking applications of nanomaterials will be appreciated.

Your contributions are welcome, and we look forward to receiving your interesting work.

Department of Physics, University  
of California Davis, One Shields  
Avenue, Davis, CA 95616-5270,  
USA

## Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal-organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Chemistry, Multidisciplinary*) / CiteScore - Q1 (General Chemical Engineering)
