Special Issue

Advances in Nano-Enhanced Thermal Functional Materials

Message from the Guest Editors

This Special Issue of *Nanomaterials* aims to highlight recent research advances in developing advanced nano-enhanced thermal functional materials for a variety of heating/cooling related applications. We are looking forward to receiving contributions in the form of both research articles and review articles related to the synthesis, characterization, application of nanoenhanced thermal functional materials from diverse research disciplines to promote further rapid growth of the field. Potential topics include, but are not limited to, the following:

- Nanostructured thermal conversion materials;
- Nano-enhanced thermal storage materials;
- Nano-enhanced thermal management materials;
- Nano-enhanced thermal responsive materials;
- Mechanistic understanding of nano-enhancement effect:
- Diverse thermal-related applications

About the Journal

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometerscale dimensions, which we call "nanomaterials". These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal-organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, Nanomaterials, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access. We are proud of our increasing impact factor and ability to provide rapid decisions to authors.

Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones

School of Geography, Earth and Environmental Science, University of Birmingham, Birmingham B15 2TT, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General Chemical Engineering)
