

Special Issue

Low Dimensional Materials Fabrication, Characterization and Applications

Message from the Guest Editor

Low Dimensional Materials Fabrication, Characterization and Applications” will present a collection of high-quality original research papers and comprehensive reviews concerning the recent advances in the field of nanostructures, 2D materials, nanoelectronics, nanosensors, and devices. This Special Issue aims to highlight new understandings, new techniques, new results, new theories, and new innovative approaches and developments in all aspects of the fabrication, characterization, and application of nanostructures, 2D materials, nanoelectronics, nanosensors, and nanodevices and their integration in existing and emerging applications.

About the Journal

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano-alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones

School of Geography, Earth and Environmental Science, University of
Birmingham, Birmingham B15 2TT, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q1 (General
Chemical Engineering)
