

Special Issue

Laser Synthesis and Processing of Nanostructured Materials

Message from the Guest Editors

This Special Issue will focus on the fabrication of nanotextured surfaces and nanomaterials using common laser-fabrication technologies, including, but not limited to, direct laser nanopatterning, laser-induced periodic surface structuring, laser ablation/fragmentation in liquids, and laser-induced deposition. Special attention will be given to common and emerging applications as well as devices realized using nanostructures produced by the mentioned laser technologies. To sum up, this Special Issue welcomes original and review contributions highlighting the recent trend in the fabrication and application of functional nanostructures, nanomaterials and nanotextured surfaces using laser radiation. See more information at <https://mdpi.com/si/119827>. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Nanoscience and nanotechnology are exciting fields of research and development, with wide applications to electronic, optical, and magnetic devices, biology, medicine, energy, and defense. At the heart of these fields are the synthesis, characterization, modeling, and applications of new materials with lower nanometer-scale dimensions, which we call “nanomaterials”. These materials can exhibit unusual mesoscopic properties and include nanoparticles, coatings and thin films, metal–organic frameworks, membranes, nano–alloys, quantum dots, self-assemblies, 2D materials such as graphene, and nanotubes. Our journal, *Nanomaterials*, has the goal of publishing the highest quality papers on all aspects of nanomaterial science to an interdisciplinary scientific audience. All of our articles are published with rigorous refereeing and open access.

Editor-in-Chief

Prof. Dr. Eugenia Valsami-Jones
School of Geography, Earth and Environmental Science, University of
Birmingham, Birmingham B15 2TT, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Multidisciplinary) / CiteScore - Q1
(General Chemical Engineering)
