submissions:

1 June 2025

Message from the Guest Editors

The field of nursing is constantly evolving, driven by advances in technology and the growing demands of a globalized healthcare system. Health literacy plays a critical role in improving health outcomes, patient engagement, and the overall effectiveness of healthcare delivery. This Special Issue will focus on exploring the latest trends, innovations, and practices in nursing education and training, with a particular emphasis on health literacy.

The objective of this Special Issue is to gather contributions that:

- Analyze and propose innovative methods for integrating health literacy into nursing education.
- Examine clinical and educational nursing practices from a health literacy perspective.
- Explore the integration of advanced technologies to improve health literacy among healthcare providers and patients.
- Present research demonstrating improvements in health outcomes through enhanced health literacy.
