

Special Issue

Nursing and Allied Health Care in Rehabilitation for Dementia

Message from the Guest Editor

Nurses and allied health professionals constitute a frontline workforce providing healthcare for individuals living with dementia. This Special Issue of Nursing Reports, entitled "Nursing and Allied Health Care in Rehabilitation for Dementia," serves as a platform to spotlight the global issues and challenges faced by healthcare professionals in integrating rehabilitation services for dementia into their health systems. The scope encompasses both hospital and community settings. The aim is to gather insights from experts who can provide evidence-based discussions on the obstacles and potential solutions when incorporating rehabilitation into the post-diagnostic care of individuals with dementia. We invite submissions that delve into barriers and solutions concerning the implementation of the WHO guidelines outlined in the "Package of Interventions for Rehabilitation" for dementia. These interventions should target cognitive, psychological, physical, and social aspects of functioning, ultimately aiding individuals living with dementia in maintaining their independence, well-being, and engagement in a meaningful life.

About the Journal

Message from the Editor-in-Chief

Nursing Reports (ISSN 2039-4403) is an international, open access journal, addressing practice and policy issues across all fields of nursing science. We invite you to contribute original researches, review articles, essays or short reports for consideration and publication in the journal. Rapid turnaround time and full open access offer the opportunity to make research results immediately available to scientific communities and the general public.

Editor-in-Chief

Prof. Dr. Richard Gray
School of Nursing and Midwifery, La Trobe University, Melbourne, VIC
