Clinical Medicine, University of  
Florence, Florence, Italy

Deadline for manuscript  
submissions:

**closed (25 October 2024)**

### Message from the Guest Editor

Dear Colleagues,

The interconnection between nutrition and the immune system has been an area of growing interest in recent years. As scientific understanding expands, it becomes increasingly evident that nutrition can significantly impact the development and progression of immune-related conditions, spanning from cancer to inflammatory disorders and autoimmune diseases. We encourage submissions that delve into the molecular mechanisms through which nutrition influences the immune response, innovative nutritional interventions that hold promise for patient management, and evidence-based studies highlighting the effects of specific dietary components on immune-mediated diseases.

This Special Issue seeks to foster collaboration between researchers, healthcare practitioners, and nutrition experts to bridge the gap between scientific knowledge and patient care. By sharing novel insights and evidence-based practices, we hope to pave the way for the development of personalized nutritional approaches in the prevention and treatment of immune-mediated diseases.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)

## Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
