Deadline for manuscript  
submissions:

**closed (5 April 2024)**

### Message from the Guest Editors

Inflammation is part of the body's defense mechanism and is based on the activation of immune and non-immune cells able to recognize and remove harmful and foreign stimuli, promoting tissue repair and recovery. Failure in resolving inflammation and/or long-term, repeated stimulation of the immune system may lead to systemic chronic inflammation, which is involved in the disease process of many conditions.

In this context, dietary nutrients play a key role in promoting or inhibiting pro-inflammatory mediators' production. An unbalanced diet that is hyperaloric, rich in saturated fatty acids and/or refined sugar, or low in bioactive compounds can alter the immune balance toward pro-inflammation. Conversely, an adequate diet is able to maintain immune homeostasis directly by interacting with innate and adaptive immune components, or indirectly through gut microbiota and their metabolites.

This Special Issue aims to collect original articles as well as review articles that share information on the role of the diet components in preventing or ameliorating systemic inflammatory diseases by promoting improved immune health."

Insular Materno Infantil (CHUIMI),  
Canarian Health Service, 35016  
Las Palmas, Spain

### **Prof. Dr. Maria Luz Fernandez**

Department of Nutritional  
Sciences, University of  
Connecticut, Storrs, CT 06269,  
USA

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)

## Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
