Message from the Guest Editors

Dear Colleagues,

This Special Issue, entitled “Dietary Strategies in Metabolic Disorders”, will explore the impact of the different types of nutritional intervention on metabolic diseases with an increasing prevalence worldwide, including type 2 diabetes and its complications, obesity, dyslipidemia, metabolic syndrome, atherosclerosis and metabolic liver disease. We aim to elucidate the role of the nutrient composition, calorie intake and eating timing in different aspects of the prevention and management of these metabolic disorders. We also welcome studies on novel molecular targets and the genetic background that regulates the metabolic response to nutrition. This content may be useful for medical doctors, practicing dieticians and nutritional researchers.

We look forward to the submission of interesting and attractive manuscripts, including original articles and review articles, to this Special Issue.

Deadline for manuscript submissions:

closed (25 August 2024)
