Message from the Guest Editors

“Let food be thy medicine”

In this Special Issue of *Nutrients*, we will address several important aspects of this interdisciplinary biomedical field based on new and clinically relevant information that may impact patient care, as well as lead to novel opportunities for research and discovery.

Among others, potential topics to be considered for publication in this issue are:

- Weight loss interventions/dietary patterns and components/plant-based foods and their bioactive compounds in nonalcoholic fatty liver disease;
- Nutritional assessment and management of liver cirrhosis in compensated and decompensated states;
- Enteral versus parenteral nutrition in acute and acute-on-chronic liver failure;
- Phytosterols/Omega-3 PUFA in nonalcoholic fatty liver disease;
- Probiotics and dietary interventions in hepatic encephalopathy;
- Combating sarcopenia in liver disease;
- Nutritional supplementation after liver transplantation.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Food Science)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
