Unit of Pediatrics, Department of
Medicine and Surgery, University
Kore of Enna, Cittadella
Universitaria, 94100 Enna, Italy

Deadline for manuscript
submissions:

closed (25 November 2024)

Message from the Guest Editor

Dear Colleagues,

Many epidemiologic studies report a protective association between a balanced and adequate diet and cognitive impairment, brain health and neurodegenerative diseases. The neuroprotective properties may be linked directly to caloric restrictions or to some neuroprotective properties of food (in long-chain-polyunsaturated fatty acids, vitamin E and mineral elements).

Preventive interventions on neuroinflammation seem to be able to interfere with neurodegeneration, enhancing antioxidative defense, and lowering the risk and incidence of age-related diseases, such as cardiovascular diseases and neurodegenerative diseases. It should be noticed that dietary supplementation-based strategies have been demonstrated to be effective in subjects with mild cognitive impairment, or directly in metabolic disorders in whom a specific enzymatic deficit may require specific dietary restrictions.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
