submissions:

**closed (25 July 2023)**

### **Message from the Guest Editors**

Dear Colleagues,

Many diet-related chronic diseases such as diabetes, cardiovascular disease, and certain cancers, disproportionately impact groups of a particular race, ethnicity, gender, socioeconomic status, religion, immigration status, sexual orientation or gender identity, age, cognitive and/or physical disability, and geographical location. Equitably addressing health disparities will require approaches (e.g., interventions, policies, etc.) that consider the contexts of the most impacted populations. This will require a greater understanding of the contextual factors that support or hinder health-promoting actions (e.g., healthy eating, being physically active, engaging in routine medical care for disease prevention and management, etc.) and using this knowledge to develop solutions that appropriately address these factors.

For this Special Issue, we are seeking papers that examine the relationships between contextual factors and nutrition and/or health in populations impacted by health disparities. We also welcome papers exploring specific approaches (e.g., interventions-at any stage, policies, strategies, etc.) developed for these populations.

an Open Access Journal by MDPI

## Editors-in-Chief

### **Prof. Dr. Lluís Serra-Majem**

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

### **Prof. Dr. Maria Luz Fernandez**
