Deadline for manuscript  
submissions:

**closed (29 February 2020)**

### Message from the Guest Editor

Dear Colleagues,

This Special Issue will focus on selected plants and phytochemicals therein to describe the role of dietary phytochemicals that modify cell signaling pathways. Plants are well known to generate a variety of phytochemicals that possess unique physical and chemical properties. The attributes of each phytochemical are responsible for producing unique chemical interactions with traditional and novel disease targets. A layer of complexity includes the use of combinations of phytochemicals present in selected extracts and how these phytochemicals generative a comprehensive pharmacological response.

More specifically, this Special Issue will focus on understanding how dietary phytochemicals, isolated and present in unique combinations, can be used for generating positive benefits with respect to overall health.

Prof. Jeremy J. Johnson

## Editors-in-Chief

### **Prof. Dr. Lluís Serra-Majem**

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

### **Prof. Dr. Maria Luz Fernandez**

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
