Deadline for manuscript  
submissions:

**closed (5 May 2024)**

### Message from the Guest Editor

Dear Colleagues,

Colorectal cancer is a common type of malignancy that affects the colon and rectum. While there are various treatment options for colorectal cancer, there is mounting evidence that suggests nutrition can play an important role in both preventing and treating the disease.

This Special Issue will focus on the role of nutrition in the prevention and treatment of colorectal cancer. The Special Issue will provide a comprehensive overview of the latest research on nutrition and colorectal adenoma or cancer, highlighting the potential for nutrition interventions to improve outcomes for individuals with colorectal cancer or those who have had a prior history of colorectal cancer. It will also identify areas for future research and public health initiatives to promote healthy eating habits and reduce the burden of colorectal cancer.
