Message from the Guest Editors

Dear Colleagues,

A healthy diet prevents many chronic-degenerative diseases and ensures a healthy and long life. But what is a healthy diet? A large number of epidemiological studies provide data regarding dietary predictors of negative health outcomes. This Special Issue of *Nutrients*, entitled “Definition of Healthy Diet for Healthy People: Data From Epidemiological Studies” aims to sample a number of contribution by well-recognized experts in order to analyse the predictors of a good health and healthy aging, with the aim of defining the concept of a “positive nutrition”. Consensus documents, narrative reviews, systematic reviews, meta-analyses, and epidemiological trials resuming and reporting data on dietary components and dietary patterns associated with human longevity and good health in different geographical settings are welcome. Preclinical studies are also welcome, but only if they have a direct impact or relationship with human health and longevity.

Prof. Dr. Arrigo Cicero

Dr. Federica Fogacci

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Food Science)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
