Deadline for manuscript submissions:

closed (30 September 2021)

Message from the Guest Editor

Diet is currently considered one of the main modifiable risk factors for cancer. It is estimated that between 30% and 35% of cancer deaths can be attributed to diet and nutrition-related factors, although this proportion can vary strongly according to the type of cancer. Despite several decades of epidemiological research on the diet–cancer relationship, authorities on cancer prevention continue to find convincing evidence only for some of the many studied dietary factors. Studies have also often focused on the influence of specific nutrients or food groups, but in more recent years, interest in dietary patterns has been growing.

The aim of this Special Issue is to further elucidate the relationship between diet, nutrition, and cancer. We invite submissions on the role of diet patterns, specific food groups, and other nutrition-related factors (e.g., obesity) in cancer epidemiology. Submissions focused on any type of cancer are welcome, as are reports of original research or reviews.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Food Science)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
