Surgical Sciences, University of
Foggia, 71122 Foggia, Italy

Deadline for manuscript
submissions:

closed (31 October 2022)

Message from the Guest Editor

The association between dietary carbohydrate intake, insulin metabolism and longevity are well known, i.e., between the intake of high glycemic index carbohydrates, insulin resistance, and the onset of metabolic syndrome, type 2 diabetes, cardiovascular disease, non-alcoholic fatty liver disease, cancers, and Alzheimer's disease. All these pathological states are characterized by chronic low-grade inflammation. Dietary patterns rich in complex carbohydrates with a low glycemic index, such as the Mediterranean Diet, have been shown to influence inflammatory processes and responses. This Special Issue of *Nutrients* has been developed to compile contemporary research studies on this important topic. We invite you and your collaborators to consider the submission of your original research, protocol development, and methodological studies, narrative or systematic reviews, and meta-analyses. To better understanding these complex relationships, we welcome all types of study designs in various populations, including large observational epidemiological studies, systematic reviews and meta-analyses, clinical and field trials, and qualitative investigations.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Food Science)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
