Genetics of Complex Phenotypes,  
Bambino Gesù Children's  
Hospital, IRCCS, 00146 Rome,  
Italy

Deadline for manuscript  
submissions:

**closed (25 April 2022)**

### **Message from the Guest Editor**

Food bioactive compounds are natural components generally present in small quantities in foods and possess biological activity in addition to having nutritional value. Most of these food bioactive compounds are present in small quantities in a variety of foods, including fruits, vegetables, cereals, oilseeds, and oils. These bioactive compounds are currently being intensively studied in order to evaluate their effects on health and enhance their biological activity on specific organs, such as the liver.

Potential issues may include but are not limited to interventional studies on the effect of different classes of bioactive compound (polyphenolic compounds, carotenoids, tocopherols, phytosterols, and organosulfur compounds) on human chronic liver diseases. These include diseases primarily affecting the liver such as chronic hepatitis, fibrosis, cirrhosis, alcoholic and nonalcoholic fatty liver, hepatocellular carcinoma, diseases caused by the immune system, and inherited conditions.

an Open Access Journal by MDPI

## Editors-in-Chief

### **Prof. Dr. Lluís Serra-Majem**

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

### **Prof. Dr. Maria Luz Fernandez**

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Food Science)
