Deadline for manuscript submissions:

closed (31 July 2020)

Message from the Guest Editors

Intestinal failure is the latest of the organ failures to benefit from a wider recognition, even though it is still underdiagnosed and therefore undertreated. It can be acute or sub-acute, usually after surgery, but it can also be chronic, and most patients with chronic intestinal failure are ambulatory.

Home parenteral nutrition is the key life-saving treatment of chronic intestinal failure, even though most HPN patients have a preserved intestinal function and should therefore receive another form of nutritional support (i.e., enteral nutrition). HPN is not without complications, and central line-associated bloodstream infections, loss of vascular access, and liver failure, among others, can be life-threatening.

This Special Issue seeks papers related to intestinal failure and home parenteral nutrition (whether for chronic intestinal failure or for other indications). This invitation is addressed at all healthcare providers (i.e., gastroenterologists, surgeons, clinical nutrition experts, palliative care physicians, dieticians, nurses, pharmacists, and psychologists) involved in the care of home parenteral nutrition adult and pediatric patients.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Food Science)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
