Message from the Guest Editor

Dear Colleagues,

The tremendous progress in the field of biotechnology opened a new era in the field of human milk oligosaccharides (HMOs). HMOs are currently being investigated in laboratory, preclinical, and clinical studies. The Special Issue deals with the role of human milk oligosaccharides in infants' health. Renowned experts have been invited for their critical view on the analytical aspects, the evolution of microbial colonization in early life, and other potential health effects that have been investigated in preclinical and clinical studies.

Prof. Dr. Silvia Rudloff
