Message from the Guest Editor

Dear Colleagues,

Nutrition does support our bodies with what is needed for growth and development. The bricks of life, represented in macronutrients and micronutrients do not only have effects on growth and functionality, they also play important roles in the neuropsychiatric development of children and adolescents. Children with Neuropsychiatric Diseases might need individualised composition of their daily meals. Special diets might be helpful such as the ketogenic diet for children with medication refractory epilepsy as a prominent example.

The role of the microbiome in the context of neuropsychiatric disorder may also be important as current results are implicating. Ideas and latest research in this field will hopefully allow to help children with Neuropsychiatric Diseases to improve.

This special issue will focus on the relationship between nutrition and Neuropsychiatric Diseases/development in children as a promising field of research and new discoveries in addition to pharmacological help.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Food Science)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
