Message from the Guest Editors

Dear Colleagues,

Nutrition on oral health has been given much more attention in recent times, contributing to a better understanding of cariogenic processes, periodontal inflammation, and dysbiosis of the microbiome. Research on this topic demands adequate methods for collecting or generating relevant data as well as for analyzing these data.

This Special Issue welcomes manuscripts on:

- To collect nutrition data of high quality e.g., tools for dietary intake measurements;
- To determine aspects of oral health, e.g., oral microbiology, oral health status, oral and systemic inflammation;
- Data analytic approaches to investigate the relation between nutrition and oral health, e.g., machine learning and causal inference;
- To take into account specific characteristics of the data, e.g., compositional data analysis or methods for high dimensional data.

We welcome different types of manuscripts, including suggestions for new methods, systematic investigations on existing methods, review and reflection papers, as well as case studies motivated by an interesting method or a novel application.

Dipl.-Math. Kirstin Vach

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Food Science)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
