Nutritional Metabolomics in Cancer Epidemiology

Guest Editor:

Dr. Mary C. Playdon

University of Utah and Cancer Control and Population Sciences Program, Department of Nutrition and Integrative Physiology, Huntsman Cancer Institute, University of Utah, Salt Lake City, UT 84112, USA

Deadline for manuscript submissions:

closed (22 February 2023)

Message from the Guest Editor

Diet plays an important role at different stages of carcinogenesis, from initiation to progression of disease. While the evidence for the relationships of certain foods, beverages, dietary patterns, and dietary supplements with some cancers is considered convincing, there is a lack of clarity on many dietary exposures, particularly in relation to cancer subtypes.

The emergence of nutritional metabolomics has uncovered a multitude of food-derived dietary metabolites and endogenous metabolites reflecting the influence of diet on human metabolism. These developments provide an avenue for improving dietary measurement to resolve outstanding research questions that have been limited by measurement error and biases.

This Special Issue will encompass recent research in the field of nutritional and cancer epidemiology with an emphasis on the application of metabolomics (including lipidomics) technology to the study of diet and cancer. Both original articles and reviews spanning clinical and observational research studies are welcome.

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
2. Research Institute of Biomedical and Health Sciences (IUIBS), University of Las Palmas de Gran Canaria, 35001 Las Palmas, Spain
3. Preventive Medicine Service, Centro Hospitalario Universitario Insular Materno Infantil (CHUIMI), Canarian Health Service, 35016 Las Palmas, Spain

Prof. Dr. Maria Luz Fernandez

Department of Nutritional Sciences, University of Connecticut, Storrs, CT 06269, USA

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)
