Message from the Guest Editors

Dear Colleagues,

We are pleased to announce a new Special Issue entitled “Nutritional Support for the prevention of cardiovascular disease in childhood” in *Nutrients*, a peer-reviewed scientific journal indexed in the Science Citation Index Expanded (SCIE) and Social Sciences Citation Index (SSCI). The latest released impact factor for this journal is 5.719 (Journal Citation Report, 2020 Edition).

It is widely known that atherosclerosis begins in the perinatal period and evolves throughout childhood and adolescence into adulthood. Preventive strategies must thus be seriously considered and implemented starting from the pediatric stage, in the first years of life. Furthermore, nutrition is a crucially important and positive epigenetic factor for the prevention of cardiovascular disease in childhood. This Special Issue welcomes original research articles presenting quantitative or qualitative data as well as reviews on nutritional intervention and support in cardiovascular disease in pediatric patients.

Dr. Giuseppe Banderali
