Message from the Guest Editor

Dear Colleagues,

This Special Issue was proposed to clarify the immunotherapeutic approaches used in cardiovascular disease.

Cardiovascular disease is one of the most common throughout the world. With the increase in life stress and the diversification of diet, more and more people, including younger groups, are vulnerable to it. It is well established that innate and adaptive immune responses have an essential role in the development and progression of many cardiovascular diseases. In recent years, significant progress in understanding the impact of diets and nutrient interventions on influencing the immune system and cardiovascular disease has been made.

This Special Issue of *Nutrients* welcomes original research articles, animal and clinical studies, and review articles on the current state of research.

Sciences, University of
Connecticut, Storrs, CT 06269,
USA

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Nutrition and Dietetics)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
