Message from the Guest Editors

The relationship between bioactive peptides and human health is noteworthy, and this knowledge can be a starting point for the development of new biotechnological opportunities, allowing the production of new functional foods that can improve human and/or animal health.

The goal of this Special Issue is to publish both recent innovative research advances and review papers on the following topics:

The identification of new bioactive peptides released during gastrointestinal digestion, food processing, fermentation and protein enzymatic hydrolysis.

The isolation and identification of new bioactive peptides from food matrices and food by-products.

Evaluation of the effects of fermented food-derived bioactive peptides (in vitro, in vivo and ex vivo).

The role of bioactive peptides in cell signalling related to human health.

The development of new nutraceuticals and functional foods with bioactive peptides.

an Open Access Journal by MDPI

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Food Science)
