Message from the Guest Editors

Dear Colleagues,

Biomarkers and nutrients play a key role in the diagnosis, prognosis, and status of patients who suffer from musculoskeletal disorders. This MDPI Special Issue included in *Nutrients* and entitled “Biomarkers and Nutrients in Musculoskeletal Disorders” welcomes the submission of original research papers, including clinical trials, quasi-experimental studies, cross-sectional studies, cohort studies, case-control studies, basic sciences and diagnosis or reliability studies, as well as reviews or meta-analysis about current research literature on biomarkers and nutrients related to musculoskeletal disorders. The topics of interest are multidisciplinary, such as biomarkers, nutrients, nutrition, geriatrics, internal or sports medicine, rheumatology, orthopedics, physical therapy, and primary and specialized care related to musculoskeletal disorders. The Guest Editors encourage authors from a wide range of disciplines to submit their proposals.

an Open Access Journal by MDPI
