Epidemiology and Medical  
Statistics, School of Medicine,  
National and Kapodistrian  
University of Athens, 75 Mikras  
Asias Street, 115 27 Athens,  
Greece

Cancer is a major cause of morbidity and mortality worldwide, posing a tremendous burden on both individuals and on society as a whole. Currently, more people are living with and surviving from cancer than ever before, partly due to the positive developments in this field, such as earlier detection and/or better treatment for several cancer types.

Deadline for manuscript  
submissions:

**closed (20 December 2022)**

Considering the success of the previous Special Issue "Nutrition for Cancer Survivors", we are pleased to announce that we are launching a second Special Issue on this topic. The objective of this Special Issue on "Nutrition for Cancer Survivors II" is to continue to elucidate the relevance of nutrition and other nutrition-related factors, with a focus on the post-diagnosis period and following cancer treatment, with cancer-specific and all-cause mortality, cancer recurrence and survival, as well as with other health-related outcomes, among cancer survivors. The optimal goal is to contribute to the development of evidence-based dietary recommendations tailored specifically to cancer survivors, and to promote the health and well-being of this growing population.

an Open Access Journal by MDPI

## Editors-in-Chief

### **Prof. Dr. Lluís Serra-Majem**

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain
