Nutrition for Cancer Survivors II

Guest Editor:

Message from the Guest Editor

Prof. Dr. Vasiliki Benetou

Department of Hygiene,
Epidemiology and Medical
Statistics, School of Medicine,
National and Kapodistrian
University of Athens, Athens,
Greece

Cancer is a major cause of morbidity and mortality worldwide, posing a tremendous burden on both individuals and on society as a whole. Currently, more people are living with and surviving from cancer than ever before, partly due to the positive developments in this field, such as earlier detection and/or better treatment for several cancer types.

Deadline for manuscript
submissions:

closed (20 December 2022)

Considering the success of the previous Special Issue "Nutrition for Cancer Survivors", we are pleased to announce that we are launching a second Special Issue on this topic. The objective of this Special Issue on "Nutrition for Cancer Survivors II" is to continue to elucidate the relevance of nutrition and other nutrition-related factors, with a focus on the post-diagnosis period and following cancer treatment, with cancer-specific and all-cause mortality, cancer recurrence and survival, as well as with other health-related outcomes, among cancer survivors. The optimal goal is to contribute to the development of evidence-based dietary recommendations tailored specifically to cancer survivors, and to promote the health and well-being of this growing population.
