Message from the Guest Editor

With the advance of knowledge in the field, the complexity of gene–nutrient interactions has become evident. Moreover, the need to take into consideration not only interactions between genes and nutrients but also between nutrients and the epigenome or the microbiome is being considered. In this regard, the term *precision nutrition* has emerged that includes the complexity of the interaction between nutrients and biological processes.

In this Special Issue, we would like to bring readers closer to the state-of-the-art in the field by gathering papers covering different aspects of gene–nutrient, epigenome–nutrient, and microbiome–nutrient interactions related to human health. Original research articles and reviews (systematic reviews and meta-analyses) are welcome.
