Message from the Guest Editors

Malnutrition is a frequent critical problem for a proportion of cancer patients. Despite the robust evidence showing an association between nutritional status and clinical outcomes, the attitude towards nutrition care varies considerably among oncologists, and a significant proportion of patients do not receive adequate nutritional support.

The recognition of the importance of nutrition in cancer rehabilitation has been suggested among the key objectives for a global core curriculum in medical oncology. However this would require increased knowledge of nutritional issues among health care professionals, which is still far from being the case. It is vital that nutritional support should be prescribed and monitored by professionals with specific skills in clinical nutrition, who should be part of the multidisciplinary teams providing early palliative care.

The purpose of this special issue is to provide health care professionals involved in cancer patients care with a comprehensive overview of the aims and current evidence about nutrition in oncology, together with updated practical recommendations on the application of nutritional therapy in cancer patients.

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Lluís Serra-Majem

1. Centro de Investigación Biomédica en Red Fisiopatología de la Obesidad y la Nutrición (CIBEROBN), Institute of Health Carlos III, 28029 Madrid, Spain

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Nutrition and Dietetics) / CiteScore - Q1 (Food Science)

Message from the Editorial Board

Nutrients is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
