Deadline for manuscript submissions:

closed (30 June 2022)

Message from the Guest Editor

Dear Colleagues,

Innovative dietary assessment tools and methods are needed in large-scale epidemiological studies to produce the best estimates of individual intake and to better address public health strategies. The goal of this Special Issue, entitled “Innovative Strategies, Methods, and Tools For Dietary Assessment in Public Health”, is to focus on the importance of new dietary assessment approaches to provide more accurate estimates of diet in epidemiological studies.

The Special Issue welcomes the submission of original research, narrative reviews, systematic reviews, and meta-analyses to provide public health professionals with a widespread, clear and updated body of evidence on innovative approaches to better investigate the diet–health relationship.

Prof. Dr. Martina Barchitta
