### Message from the Guest Editor

Dear Colleagues,

For this Special Issue of *Nutrients*, entitled “Meat Consumption and Human Health”, we welcome submission of manuscripts for this timely topic area of public health importance. Submissions may include original analytical research (cohort and case-control studies; randomized clinical trials), descriptive surveys (cross-sectional studies), and systematic reviews and quantitative meta-analyses. Because the relationship between meat consumption, including specific types of meat, and health outcomes is a broad topic area, manuscripts may cover an array of scientific hypotheses related to meat intake. In addition, studies and/or reviews may update the state-of-the-science on meat intake and chronic disease outcomes by helping to clarify the complex methodological, analytical, and generalizability issues in studies of diet and health.
