Deadline for manuscript  
submissions:

**closed (20 July 2021)**

### Message from the Guest Editor

Dear Colleagues,

The strict interrelationship between nutrition and health outcomes has been increasingly recognized for all ages. In particular, a huge amount of research indicates early postnatal life as an extremely sensitive period to the effect of specific nutrients on organ systems' health, with profound consequences across one's life span. The current Special Issue aims to welcome original works and literature reviews further exploring the effect of specific feeding strategies on individual anthropometric growth and neurofunctional development, from lactation to complementary feeding through the first years of life and the nutrition-related factors that drive programming mechanisms.

Prof. Dr. Maria Lorella Gianni
