

## Special Issue

# Nutrition as Prevention and Treatment for Colorectal Cancer

### Message from the Guest Editor

Colorectal cancer is a common type of malignancy that affects the colon and rectum. While there are various treatment options for colorectal cancer, there is mounting evidence that suggests nutrition can play an important role in both preventing and treating the disease. This Special Issue will focus on the role of nutrition in the prevention and treatment of colorectal cancer. The Special Issue will provide a comprehensive overview of the latest research on nutrition and colorectal adenoma or cancer, highlighting the potential for nutrition interventions to improve outcomes for individuals with colorectal cancer or those who have had a prior history of colorectal cancer. It will also identify areas for future research and public health initiatives to promote healthy eating habits and reduce the burden of colorectal cancer.

## About the Journal

### Message from the Editorial Board

*Nutrients* is an on-line open access journal that was first published in 2009. *Nutrients* adheres to rigorous peer-review and editorial processes and publishes only high quality manuscripts that address important issues related to the impacts of nutrients on human health. The Impact Factor of *Nutrients* has risen rapidly since its establishment and it is now ranked in the first quartile of journals publishing in the field of nutrition and dietetics research.
