

Novel Research on Optometry and Vision Sciences

Guest Editor:

Dr. José-María Sánchez-González

Department of Physics of
Condensed Matter, Optics Area,
University of Seville, 41012
Seville, Spain

Deadline for manuscript
submissions:

closed (30 September 2021)

Message from the Guest Editor

Currently research in Optometry and Vision Sciences covers fields ranging from refractive surgery or binocular vision to the eye surface or contactology. Optometrist and Vision Sciences Research work involves continually making clinical decisions based on the measurements obtained in various diagnostic tests. However, it is necessary to know to what extent we can trust the data collected, the reliability of each test and the margin of error in taking measurements. This is determined in the validation studies.

Research is the present of our profession and must also be the future. This will enable us to obtain more optimized clinical practice. Research is the result of our knowledge power and a source of new inspiration and progress.

This Special Issue invites original research and review articles on recent advances in advanced and clinical optometry, refractive surgery and ocular surface research and binocular vision or contactology innovative studies.

Message from the Editorial Board

Optics (ISSN 2673-3269) aims at establishing *Optics* as a leading journal for publishing high impact fundamental research and applications in optics field with a fast processing time and high quality service. The journal particularly welcomes both theoretical (simulation) and experimental research within our journal's scope. We encourage scientists to publish their experimental and theoretical results in as much detail as possible. So, there is no restriction on the length or pages of the papers. The full experimental details must be provided so that the results can be reproduced. Electronic files and software regarding the full details of the calculation or experimental procedure, if unable to be published in a normal way, can be deposited as supplementary electronic material.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **ESCI (Web of Science)**, **Scopus**, **EBSCO**, and **other databases**.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 19.6 days after submission; acceptance to publication is undertaken in 5.2 days (median values for papers published in this journal in the first half of 2024).
