

Special Issue

Chemistry of Heterocyclic Compounds

Message from the Guest Editors

The chemistry of heterocyclic compounds is one of the biggest branches of the chemical literature because of the variety of chemical reactions that heterocyclic compounds can undergo, but also because of the numerous applications of their derivatives. The aim of this Special Issue is to collect articles (original research articles and reviews) on heterocyclic compounds, on their derivatives, and of course, on the numerous and varied applications of these compounds, so that scholars in this field can find interesting information on this subject.

Guest Editors

Prof. Dr. Lucia Emanuele

Department of Art and Restoration, University of Dubrovnik, Branitelja Dubrovnika, 41, 20000 Dubrovnik, Croatia

Prof. Maurizio D'Auria

Dipartimento di Scienze, Università della Basilicata, Via dell'Ateneo Lucano 10, 85100 Potenza, Italy

Deadline for manuscript submissions

closed (30 September 2025)

About the Journal

Message from the Editor-in-Chief

Organics is an open-access journal that offers rapid dissemination of innovative, informative, and impactful results in every aspect of organic chemistry, with a particular emphasis on new or significantly improved research results in the field of organic chemistry. The aim of this journal is to encourage scientists to publish their experimental and theoretical results in great detail to facilitate the advancement of organic chemistry. Main subject areas include but are not limited to: organic synthesis, synthetic methodology, theoretical organic chemistry, physical organic chemistry, supramolecular and macromolecular chemistry, heterocyclic chemistry, organocatalysis, bioorganic chemistry, organometallic chemistry, functional organic materials, etc. There is no restriction on the maximum length of the papers. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible.

Editor-in-Chief

Prof. Dr. Wim Dehaen

Sustainable Chemistry for Metals and Molecules, Department of Chemistry, KU Leuven, Celestijnenlaan 200F, 3001 Leuven, Belgium

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, ESCI (Web of Science), CAPIus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 22.3 days after submission; acceptance to publication is undertaken in 4.7 days (median values for papers published in this journal in the second half of 2025).
