Chlamydia trachomatis Infections

Guest Editors:

Dr. John Papp

Laboratory Scientific Advisor,
Centers for Disease Control and
Prevention, Office of the Director,
Division of STD Prevention,
Atlanta, GA, USA

Dr. Elena Ambrosino

Institute of Public Health
Genomics, Department of
Genetics and Cell Biology,
Research Institute GROW, Faculty
of Health, Medicine & Life
Sciences, University of
Maastricht, 6229 ER Maastricht,
The Netherlands

Deadline for manuscript
submissions:

closed (31 May 2023)

Message from the Guest Editors

Dear Colleagues,

Chlamydia trachomatis is the most common sexually transmitted infection and is the leading cause of preventable blindness. Many important questions remain about the natural history of *C. trachomatis* infections, disease progression, epidemiology, and effective disease control strategies.

This Special issue is dedicated to *C. trachomatis* related pathology and epidemiology. Submissions from researchers investigating *C. trachomatis* infections and outcomes are welcome. The aim is to provide state-of-the-art summaries of current knowledge and explore emerging developments in the understanding of the pathogen, the infection, or their global impact. We look forward to your contribution.

Editor-in-Chief

Prof. Dr. Lawrence S. Young

Warwick Medical School,
University of Warwick, Coventry
CV4 7AL, UK

Message from the Editor-in-Chief

The worldwide impact of infectious disease is incalculable. The consequences for human health in terms of morbidity and mortality are obvious and vast but, when infections of animals and plants are also taken into account, it is hard to imagine any other disease that has such a significant impact on our lives—on healthcare systems, on agriculture and on world economics. *Pathogens* is proud to continue to serve the international community by publishing high quality studies that further our understanding of infection and have meaningful consequences for disease intervention.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, CaPlus / SciFinder, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Microbiology*) / CiteScore - Q2 (*General Immunology and Microbiology*)
